Teaching in the Inclusive Classroom: Instructional Strategies for All Students

A Distance Learning Graduate Course
Based on the Work of Dr. William Glasser

Course Syllabus

With the majority of today's special education students, we are not dealing with students with physical or mental incompetence, we are dealing with children who do not learn what we teach or do not like the way we teach it. So we have to improve what we teach and make it useable to students and we have to improve how we teach it.

Dr. William Glasser

The course was made possible by the cooperation

and contributions of:

Rationale

Schools across the country today serve more than 6 million youngsters with a wide array of disabling conditions. Access to a free, quality education is the key to the uniquely American promise of equal opportunity for all. This promise was formally extended to children with disabilities with the passage in 1975 of landmark federal legislation now known as the Individuals with Disabilities Education Act (IDEA). On June 4, 1997, President William J. Clinton signed a bill reauthorizing and amending the law that is frequently referred to as IDEA '97. IDEA was reauthorized again in 2004 with significant changes concerning Individualized Educational Plans (IEPs), due process and discipline.

Among many other provisions, IDEA requires states to ensure that students with disabilities have access to the general curriculum. If a student will not be participating with non-disabled children in the regular classroom and extracurricular and other non-academic activities, an explanation in the student's individualized education program is required. (Algonssine and Ysseldyke 2006). Consequently, educators have had to rethink their approach to the education of children with special needs.

 "Special education" is now, more than ever, affecting general education classroom teachers as well as teachers certified to address specific disabilities. Over the past 10 years, the number of U.S. students enrolled in special education programs has risen 30 percent. Three out of every four students with disabilities spend part or all of their school day in a general education classroom. In turn, nearly every general education classroom across the country includes students with disabilities. (NEA 2006).

This inclusive approach of including teaching children with special needs in regular classrooms challenges teachers, schools, and districts to re-examine traditional beliefs and practices traditions and beliefs to determine which are consistent with the intent of the IDEA.   In addition, new strategies must be developed to address the unique challenges of the inclusive education and ensure the success of both special and general education students. This course is designed to help educators through this process by presenting a compendium of teaching strategies including those research has shown effective in regular classrooms and those that have been proven effective in the instruction of students with intellectual, emotional, or physical challenges.

Among approaches to effective teaching explored in this course is Dr. William Glasser's choice theory and quality schools concepts. His non-coercive instructional techniques were developed in a special education setting and are currently being successfully used in inclusive classrooms in several of Dr. Glasser's quality schools. (Glasser 2006).

Other regular classroom instructional approaches that will be presented in the course videos are identified in the course text *Commonsense Methods for Children with Special Educational Needs: Strategies for the Regular Classroom* by Peter Westwood. In his review of the research on the subject of effective teaching, Westwood found that the characteristics of effective teachers included those listed below (Westwood 2003).

Effective teachers tend to:
* have well managed classrooms;
* provide students with the maximum opportunity to learn;
* maintain an academic focus;
* have high expectations of what students can achieve;
* adopt a style that is business-like and work-oriented;
* show enthusiasm;
* use strategies to keep students on task, motivated, and productive;

* impose structure on the content to be covered;
* present new material in a step-by-step manner;
* employ direct and explicit instructional procedures;
* use clear instructions and explanations;
* demonstrate appropriate task-approach strategies;
* monitor closely what students are doing;
* adjust instruction to individual needs; re-teach when necessary; provide frequent feedback to students;
* use a variety of resources;
* spent a significant amount of time in interactive, whole-class teaching.

While good instructional design and teaching can minimize the need for adaptation, sometimes the only way to provide for children with special needs is to adapt curriculum to accommodate them. (Loreman et. al 2005) Therefore, in addition to examining effective teaching practices that have been found to be productive in regular classrooms, this course will also present approaches specifically designed for special needs; intellectual, emotional or physical challenges. The special teaching strategies illustrated in this course were drawn form those identified in the text as proven effective for teaching children with learning and developmental difficulties (Westwood 2003):

* Abundant guided practice;
* Students are reinforced through descriptive praise and encouragement.
* High levels of student participation and engagement.
* Fast pacing of lessons.
* Positive student-to-student interactions and peer assistance.
* Frequent student-teacher interactions.
* Carefully controlling and sequencing the curriculum content to be studied.
* Providing abundant opportunities for practice and application.
* Ensuring high levels of participation on the part of all students.
* Using interactive group teaching.
* Modeling by the teacher of effective ways of completing school tasks.
* Teaching children how to best attempt new learning tasks.

This will also stress the importance of professional collaboration in education in general and in the special education setting in particular. Award-winning special educa-

tion teacher Pat Beckman, states that special education students are most likely to succeed academically when "responsibility for the learning outcomes of special education students is equally shared by the classroom teacher and the special education teacher" and when instruction incorporates variation in delivery, activities, expectations, and assessment to accommodate diverse learning strengths and needs. (Beckman 1999)

In summary, this course is designed to meet the needs of teachers in today's inclusive classrooms presenting a variety of teaching strategies that have been proven effective in educating both general and special education students. In addition, the course will present an overview of the learning characteristics of children with various disabilities and video demonstrations of effective teaching practices in inclusive classroom at varying grade levels.

Course Title

Teaching in the Inclusive Classroom:
Instructional Strategies for All Students

Course Description

"Teaching in the Inclusive Classroom: Instructional Strategies for All Students"
is a three semester (five quarter) hour graduate course designed to give K-12 teachers the
theory and skills to create and teach lessons that are effective with both special education
and general education students. Participants will engage in various learning activities
through which they will learn and implement teaching strategies designed to engage the
general education students while at the same time accommodate the needs of students
with mild-moderate learning or developmental disabilities.

In addition, participants will show evidence of using multiple paths of knowledge
that include remedial methods, instructional techniques, and authentic assessment
through their lesson plan development and implementation. Underlying all approaches is
Dr. William Glasser's choice theory psychology and learner-centered philosophy.
Glasser's theories hold that students with disabilities share the same basic needs as other
children and at the same time are just as diverse in their interests, learning preferences,
and individual characteristics.

Course Goals

The goals of this course are to have participants develop a understanding of the
special educational needs of students with mild-moderate disabilities; to have participants
develop a practical understand and demonstrate a proficiency in creating and implement-
ing teaching approaches designed to accommodate the individual needs of all students,
both disabled and non-disabled.

Course Outline

In the following outline, the term "Course of Study" refers to a study plan that in-
cludes required reading, video viewing, worksheets, application assignments and progress
reports.

Session #1:   Instructional Strategies for All Students: An Introduction

> Objective: To have participants understand the scope and sequence of this course, to expose them to key concepts, to have them preview course videos and lessons, and have them complete an assessment of their current approach to teaching students with special needs.

> Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and setting of a learning goal for the course.

Session #2: Instructional Strategies for All Students: Choice Theory and Meeting Individual Needs (Upper Elementary)

> Objectives: To have participants develop an understanding of multi-grade and multi-age teaching approaches; to have participants view and analyze a sample lesson taught in a multi-grade inclusive classroom in one of Dr. Glasser's quality schools; to have participants create, implement, and evaluate a lesson or unit based either on the techniques demonstrated in the video or strategies suggested in the course text and readings.

> Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Session #3: Instructional Strategies for All Students: Real World Learning in the Inclusive Classroom (Middle School)

> Objectives: To have participants develop an understanding of Dr. Glasser's concept of "useful work" in the classroom: to have participants view and analyze a sample lesson illustrating how real world learning can make concepts more accessible to both disabled and not disabled students; to have participants create, implement, and evaluate a lesson or unit based either on the techniques demonstrated in the video or strategies suggested in the course text and readings..

> Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Session #4: Instructional Strategies for All Students: Constructivism and the Two-Step Approach (High School)

> Objectives: To have participants develop an understanding of the constructivism and how it relates to teaching in inclusive classrooms; to have

participants view and analyze a lesson taught using constructivist techniques; to have participants create, implement, and evaluate a lesson or unit based either on the techniques demonstrated in the video or strategies suggested in the course text and readings.

Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Session #5: Instructional Strategies for All Students: Teachers and Students Working Together (Middle School)

Objectives: To have participants understand the role collaboration should play in an inclusive classroom; to have participants view and analyze a lesson demonstrating effective collaboration between a regular classroom teacher and a special education teacher and between general and special education students; to have participants create, implement, and evaluate a lesson or unit based either on the techniques demonstrated in the video or strategies suggested in the course text and readings.

Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Session #6: Instructional Strategies for All Students: Differentiated Instruction (Middle School)

Objectives: To have participants develop an understand of the value of using differentiated instructional techniques; to have participants view and critically analyze lesson in which the teacher provides students a number of ways of completing an assigned task; to have participants create, implement, and evaluate a lesson or unit based either on the techniques demonstrated in the video or strategies suggested in the course text and readings.

Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Session #7: Instructional Strategies for All Students: Teaching Study Skills and Self-Management (Middle School)

Objectives: To have participants develop an understanding of value of teaching self-management skills to general and special education students: view and critically analyze a lesson that includes teaching students study skills; to have participants create, implement, and evaluate a lesson or unit

based either on the techniques demonstrated in the video or strategies suggested in the course text and readings.

Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Session #8: Instructional Strategies for All Students: Class Meetings and Communication Skills (High School)

Objectives: To have participants develop an understand of the use of class meetings and student self-evaluation at the high school level; to have participants view and critically analyze a class meeting conducted in a high school classroom; to have participants create, implement, and evaluate a lesson or unit based either on the techniques demonstrated in the video or strategies suggested in the course text and readings.

Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Session #9: Instructional Strategies for All Students: Peer Teaching and Group Learning Strategies (Lower Elementary)

Objectives: To have participants develop an understanding of using student's as tutors or facilitators in inclusive classrooms; to have participants view and critically analyze a lesson taught in a multi-grade elementary classroom; to have participants create, implement, and evaluate a lesson or unit based either on the techniques demonstrated in the video or strategies suggested in the course text and readings.

Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Session #10: Instructional Strategies for All Students: Using Choices to Teach Responsibility (Lower Elementary)

Objectives: To have participants develop an understand of the use of choices to teach students decision making skills; to have students view and critically analyze a lesson in which the teacher integrates teaching self-management into a math lesson; to have participants create, implement, and evaluate a lesson or unit based either on the techniques demonstrated in the video or strategies suggested in the course text and readings.

Assignments and Activities: Required reading in course text, viewing of

video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Session #11: Instructional Strategies for All Students: Collaboration and Team Teaching (Upper Elementary)

Objectives: To have participants develop an understanding of how special and general education teachers can best work together in teaching a lesson; to have participants view a video in which two teachers team teach a lesson in an inclusive classroom; to have participants create, implement, and evaluate a lesson or unit based either on the techniques demonstrated in the video or strategies suggested in the course text and readings.

Assignments and Activities: Required reading in course text, viewing of video, course of study supplementary reading and activities, and the creation and evaluation of a lesson or unit.

Session #12: Instructional Strategies for All Students: Assistive Technology (K-12)

Objectives: To have participants develop an understanding of the role assistive technology can play in an inclusive classroom; to have participants reflection upon course content and to have them revisit and review an area they identified as particularly appropriate to their teaching situation, or; to have participants complete a research project on assistive technology to explore in more death a aspect of course content of interest to them.

Assignments and Activities: Supplementary reading and activities; video viewing or research activity; and the creation and evaluation of a lesson or unit.

Session #13: Instructional Strategies for All Students: Scaffolded Instruction (K-12)

Objectives: To have participants develop an understanding the theory and use of scaffolding in instruction; to have participants reflection upon course content and to have them revisit and review an area they identified as particularly appropriate to their teaching situation, or; to have participants complete a research project on scaffolding or to explore in more death a aspect of course content of interest to them.

Assignments and Activities: Supplementary reading and activities; video viewing or research activity; and the creation and evaluation of a lesson or unit.

Session #14: Instructional Strategies for All Students: Teachers Helping Teachers (K-12)

Objectives: To have participants develop an understanding of the value to collaboration by evaluating suggestions from colleagues; to have participants reflection upon course content and to have them revisit and review an area they identified as particularly appropriate to their teaching situation, or; to have participants complete a research project on collaboration or to explore in more death a aspect of course content of interest to them.

Assignments and Activities: Supplementary reading and activities; video viewing or research activity; and the creation and evaluation of a lesson or unit.

Session #15: Instructional Strategies for All Students: Participant Reflection and Planning for Future Use of Course Concepts

Objectives: To have participants reflect on their course experience and on insights gained in the course; to have participants identify those course concepts that most apply to their teaching situations; to have participants develop a plan for the future use of the knowledge and skills gain in this course.

Assignments and Activities: Required reading in course text, review of videos and assignments, discussions with study team, and the creation of a plan for the future use of the knowledge and skills gain in this course.

Participant Characteristics

This course is designed for teachers and administrators in grades kindergarten through twelve. Participants will have a bachelor's degree and a valid teacher credential (if applicable). There are no other prerequisites.

Instructional Materials

Instructional materials for this course include:

a.) Basic text:

Yanoff, Jerome (2006) *The Classroom Teacher's Inclusion Handbook: Practical Methods for Integrating Studnets with Special Needs.* Arthur Coyle Press. Chicago, Illinois.

*The above text is to be replaced by a new edition scheduled to be released in February, 2007.

b.) Course Media (All videos produced in 2006):

Video: "Teaching in the Inclusive: An Introduction"

Video: "Instructional Strategies for All Students: Choice Theory and Meeting Individual Needs"

Video: "Instructional Strategies for All Students: Real World Learning in the Inclusive Classroom"

Video: "Instructional Strategies for All Students: Constructivism and the Two-Step Approach"

Video: "Instructional Strategies for All Students: Teachers and Students Working Together"

Video: "Instructional Strategies for All Students: Differentiated Instruction"

Video: "Instructional Strategies for All Students: Teaching Study Skills and Self-Management"

Video: "Instructional Strategies for All Students: Teaching Communication Skills and Self-Evaluation"

Video: Instructional Strategies for All Students: Peer Teaching and Group Learning Strategies

Video: "Instructional Strategies for All Students: Using Choices to Teach Responsibility"

Video: "Instructional Strategies for All Students: Collaboration and Team Teaching"

c.) Course of Study.

This book contains supplemental articles, summaries of course content, pre-video viewing activities, discussion questions, group activities, individual activities, worksheets, classroom application assignments, and learning reports.

d.) Bibliography.

e) Recommended Reading.

f) Internet Resources.

Learning Activities

1. For each of the fifteen (15) sections of this course, participants will complete the following activities:
      a.) Read the assigned chapters of the course text.
      b.) Read supplemental articles in the course of study book.
      c.) Participate in a study/preparation activity with a colleague.
            NOTE: While benefits are greatest when participants take this course as a part of a study team, participants can successfully complete course requirements by working with a friend or colleague who is not enrolled in the course; or, by reflecting upon the material and considering how they might use it in their teaching situations.
      d.) View instructional videos.
      e.) Discuss (see above note) course material in terms of participants' own students.
      f.) Record summary of discussion activities in progress report
      g.) Design, implement, and evaluate an application of course content in their teaching situation.
            NOTE: If participants are taking this course during the summer or at a time when they do not have access to a classroom, they follow these directions with respect to classroom application projects.
            1. If they choose to design a classroom lesson or activity for their project, they design it for a class that they have had in the past.
            2. Instead of implementing their activity in a classroom, they share their activity design with a colleague and ask for their input.
            3. Based on the input received from their colleagues, they make whatever changes they feel are appropriate to improve their activity design.
      h.) Summarize classroom application design, application experience, and evaluation in progress report.
2. Submit a final paper.

Course Outcomes

As a result of their work in this course, participants will be able to:

1.) Demonstrate the use of choice theory concepts to create lessons that engage students in learning.
2.) Demonstrate proficiency in utilizing choice theory concepts to analyze and evaluate lessons taught by other teachers.
3.) Demonstrate proficiency in utilizing course concepts to analyze and evaluate lessons taught in inclusive classrooms by other teachers.
4.) Develop, implement, and evaluate various instructional strategies designed to maximize learning in inclusive settings.
5.) Develop a systematic plan to achieve an instructional goal set at the beginning of the course.
6.) Develop and describe an action plan to implement and evaluate their systematic plan.
7.) Evaluate and reflect upon their course experience and plan for the future use of knowledge and skills gained in this course.

Progress Reporting and Assessment

Participant achievement will be measured by a combination of the following:

A. An evaluation of participant's 15 progress reports. (Outcomes 1, 2, 3, and 4.)

Each progress report will be evaluated for:
– completeness and quality of responses.
– accuracy of information.
– appropriateness of classroom application.
– quality of reflection.

B. An evaluation of participant's professional paper. (Outcomes 5, 6, and 7.)

The professional paper will be evaluated for:
– inclusion of required components.
– synthesis and analysis of course concepts.
– presentation in an organized, professional manner.
